CHECKLIST

INTRODUCE

By implementing these features, restaurants can offer a convenient and efficient online ordering experience, resulting in improved customer satisfaction.
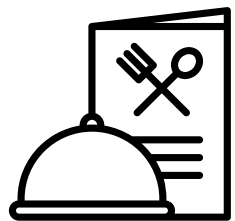

SATUVISION

CATEGORIZED
MENU

Food & Drink

Food and drink are distinct categories that should have separate sections in the menu. It helps customer to choose their

Special Sign

Give special sign like star or heart to the most purchased to let customer know which one is the best selling menu.
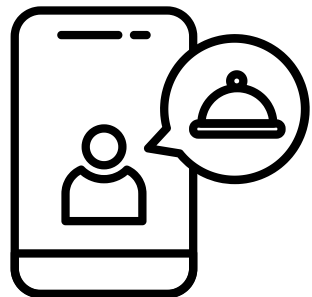

Deals Page

Create a categorized page dedicated to showcasing all restaurant deals, ensuring that customers can easily access information about the available offers.

OPTIONS FOR
DELIVERY/TAKE AWAY

Provide a user-friendly interface for customers to **select items, customize orders, and choose delivery options.**

By offering online ordering for delivery or takeaway, restaurants meet customer expectations, enhance the experience, streamline operations, and boost sales.
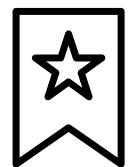

FEATURE
OUR CART/FAVORITE

The cart feature allows users to:
- Add items they want to order.
- Review their selections before checkout.
- Customize their order and view the total cost.
- Make adjustments, creating a seamless ordering process.

The favorite feature enables users to:
- Save preferred food items for future reference.
- Easily access their favorite items without searching the entire menu.
- Save time and personalize the ordering process.

USER
REGISTRATION/LOGIN

The login/register feature in a restaurant website is important because it:

- Enables a personalized experience.

- Provides order history and tracking.

- Improves customer support and assistance.

- Streamlines ordering and checkout.

By incorporating this feature, restaurants can enhance the customer experience, increase engagement, and streamline operations.
